

Bachelor of Arts and Sciences (Interdisciplinary Studies)

文理學士

The personalised BASc (Interdisciplinary Studies) provides intellectually ambitious students with maximal flexibility and choice over what they learn. We cultivate within students a rare unity between unbounded imagination and creativity (from humanistic disciplines), with rigour and systematic analysis (from scientific disciplines). Students are provided opportunities to develop compassionate leadership and work-readiness skills. As true “interdisciplinary”, BASc students in this programme will develop their potential as young scholars, with a signature intellectual agility for an ever-changing world.

Students may also develop a Personalised Concentration, a unique curriculum feature exclusive to the BASc (Interdisciplinary Studies), which allows them to build a unique educational experience around an interdisciplinary area of interest (e.g. Algorithms & Inequality).

**Interdisciplinary
Studies Major
96 Credits**
